SUMMARY_

Detail-oriented Software and Web Developer with expertise in creating dynamic and user-friendly applications. Proficient in PHP, JavaScript, HTML, CSS, Python, and Django. Skilled in designing, developing, and maintaining efficient solutions while focusing on performance optimization and responsive design. Adept at problem-solving and eager to contribute to impactful projects in a collaborative environment.

WORK EXPERIENCE_

Freelance Software Developer

2020 – Present

- Collaborated with clients to understand their software requirements and provided tailored solutions.
- Designed and developed efficient software systems to address unique business needs, ensuring optimal functionality and user satisfaction.
- Delivered projects including management systems, dynamic websites, and automation tools using Python, PHP, JavaScript, Django, and MySQL.
- Maintained long-term client relationships by providing timely support, updates, and enhancements to existing solutions.
- Gained experience in handling diverse domains, including e-commerce, inventory management, and personal portfolio projects.

PROJECTS_

Pharmacy Management System Software

- Built a comprehensive system to manage pharmacy inventory, sales, and reports efficiently.
- Utilized Django for back-end processing and MySQL for database management.

News Website

- Developed a PHP-based news website with admin and user panels, pagination, and real-time analytics.
- Integrated RSS feeds, social media features, and a newsletter notification system.

Online Shopping System

- Created an e-commerce platform with features like a shopping cart and payment gateway.
- Focused on responsive design using CSS and optimized user experience.

SKILLS_

Programming Languages: PHP, JavaScript, Python, Java, Embedded C/C++
